

NOVEMBER 2009

## Day-After-Thanksgiving Grease Collection and Recycling Event

**Friday, Nov. 27 • 9 am to 1 pm**

Save our sewers! Always pour cooled cooking grease into an empty can and not your drain!

When grease is poured down the drain, it can accumulate in our sewer lines, eventually causing blockages in the sewer system. Such blockages can cause the back up raw sewage into streets, the environment, and even into homes and other buildings.

**Join us for the fifth annual Day-After-Thanksgiving Grease Collection and Recycling Event.** Do your part to save our sewers.

Bring your used grease to one of our grease collection sites.

East – O'Reilly Chevrolet  
6160 E. Broadway Blvd.  
One block west of Wilmot Road

Northwest – Industrial Wastewater Control  
5025 W. Ina Road  
1/4 mile west of I-10

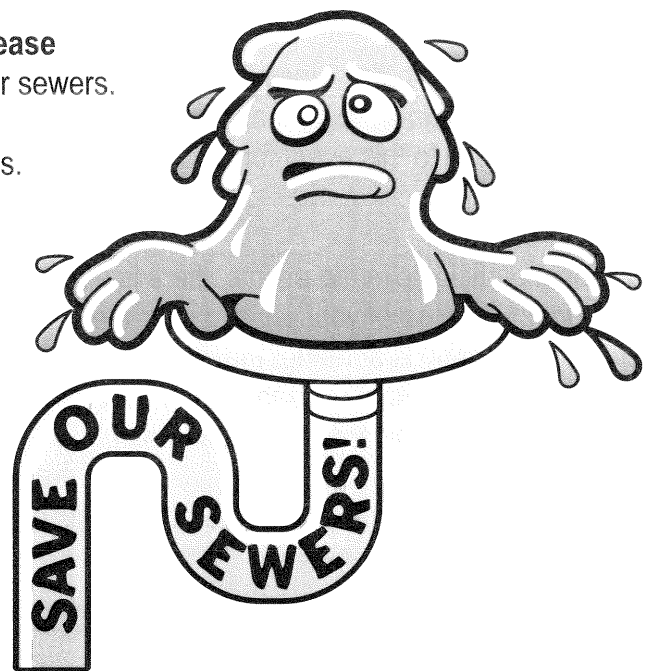

South – Tucson Water Plant #2  
1102 W. Irvington Road  
On Irvington Road, I-19 exit. Across the street from  
McDonald's Restaurant

The grease collected from this event will be recycled into biodiesel, a cleaner burning fuel.

Since the Grease Recycling Program began in 2005, we have collected and recycled more than 6,786 pounds of used cooking oil and grease.

The Grease Recycling Event is a joint partnership of the Pima County Regional Wastewater Reclamation Department, Pima Association of Governments, and Greecycle.

For information on year-round grease collection sites, please contact Greecycle at [www.greecycle.com](http://www.greecycle.com) or 628-4300.

**Never pour grease down a drain!**
